S3R2 Program
Storm Shelter, Safe Room Registration

The City of Albertville Storm Shelter Safe Room Registration (S3R2 Program) is a program initiated by citizen Ben McGowan and the Albertville Fire Department. The purpose of the Storm Shelter Registration is to provide a database of storm shelter locations in Albertville to assist emergency agencies in providing aid to victims of severe weather. The registry will be a valuable tool for emergency agencies in locating and assisting residents that may have been trapped in their storm shelters by tornado debris.

The registry consists of a list of storm shelters and valuable information for each shelter such as contact information, shelter address, shelter type, and where on the property the shelter is located. The Albertville Fire Department will maintain the database of the shelter addresses. The Albertville Police Department will insert the location in the communications software that will address specific's of the shelters. In the event of a natural disaster, address lists can be distributed to emergency responders so that those in need of assistance can be quickly located.

HOW TO PARTICIPATE

The City of Albertville encourages anyone with a safe room or storm shelter to register with the Albertville Fire Department. The application may be downloaded from the city's website, www.cityofalbertville.com, on the Fire Department page or picked up at Station #1 located at 212 South Broad Street. Complete and submit the form in person at Station #1 or return it via US Postal Service or email it to Chief Robert Terrell. Please be prepared to provide a name, phone number, shelter address, shelter location (i.e. back yard, front yard, garage, etc...), and shelter type (safe room, in-ground, basement).
